

# Reversible Laptop Sleeve

Measure length and width of laptop (incl.  $\frac{1}{2}$  of depth in measurements). Add 1" to all measurements

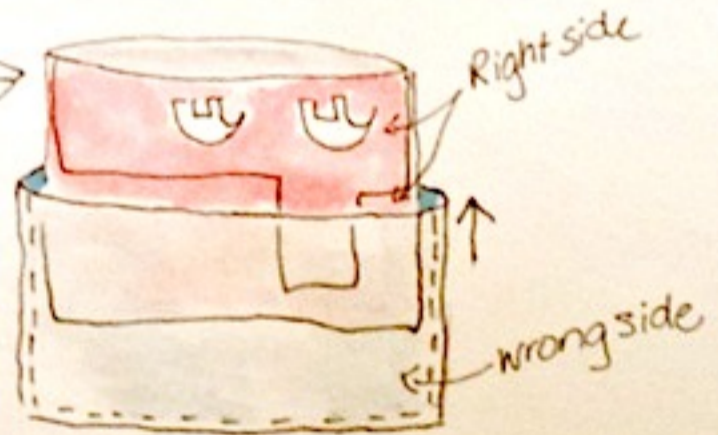

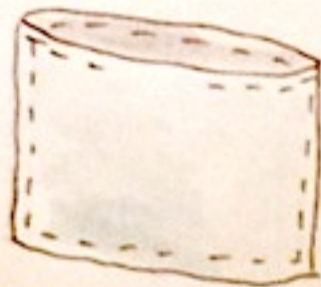

Cut 2 exterior pieces of fabric and 2 interior pieces acc. to the laptop measurements.

Cut 2 more pieces of exterior fabric the same as above & cut sections out to form a "T" shape. Interface or add batting to pieces if needed. Place right sides together & stitch as shown, leaving one long end open.

Turn exterior piece and flap to the right side out and pin flap to one side of exterior. Baste in place.

Slip interior piece over exterior piece and flap, right sides together. Pin and stitch around top leaving a 3-4 inch opening

Turn right side out through the opening and topstitch or whipstitch the opening closed.

Stitch a band of fabric to the front to hold the tab. Stitch another on the reverse side.

Enjoy!
